IPT "Halat" Station Now Solar-Powered

In the framework of its energy and environment management strategy, IPT is proud to announce that IPT Halat station is now solar-powered aiming to enhance its energy performance and to reduce the environmental impact of its operations. The Solar power system uses 80 solar panels installed on the gas station's canopy, producing 20 KWh peak of power transferred directly to the Electrical Grid through inverters. The system has an actual production of 30 MWh/year which will translate into annual savings of around \$5,000 and greenhouse gases saving of 20 Tons.

IPT is constantly striving to embed this strategy in its operations for an increased energy efficiency and sustainability. [Read more](#)

Our Stations

New IPT Station Now Open in Al Manara, West Beqaa

Our network of stations is increasingly flourishing across Lebanon. Located on the main road of Al Manara in West Beqaa, the new IPT "Abou Ali" Station has recently joined our network of stations. Fuel Up on value at IPT "Abou Ali" Station where you can have access to the eco-friendly and advanced gasoline "Quantum 98&95", IPT Diesel, Elf lubricants, and car wash. If you would like to know more about Al Manara Village, here are some info that help you get there... [Read more](#)

For Your Convenience

The Mechanical Inspection Schedule 2018

The "2018 Mechanical Calendar" is now online, and soon available at IPT Stations. Check it [here](#) to know more about the changes this year. Make sure to do all the maintenance needed for your car before the due date. [Read more](#)

Sustainability

LBC Interview with Dr. Toni Issa about the Urb-Hackathon

"With the dramatic increase of air pollution levels in Lebanese cities, rises the need for the young generation to come up with viable solutions that put an end to this nationwide issue; hereby comes the "Urb-Hackathon"; a one-of-a-kind initiative, happening for the First time not only in Lebanon, but also in the Middle East. We encourage university students, entrepreneurs, and professionals to play a major role in innovating and coming up with applicable solutions that may solve the pollution problem experienced by Lebanese cities, by participating in the Urb-Hackathon", stated Dr. Toni Issa, the President of IPT Energy Center (IPTEC) during his interview with LBC. Watch the [video](#) to know more, and [Register](#) before 15 February; places are limited.

WEEKLY FUEL PRICES

Local Fuel Prices 31/1/2018
