

# IPT LPG Solutions

## who we are

LPG is propane or butane or a mixture of both that is obtained from natural gas or as a by-product from oil refining. Propane and butane have different uses and can't be interchanged and yet both are indispensable in the home, farming, industry and commercial sectors. To ensure your LPG gas solutions are properly covered you need a provider with expertise and prompt service.

IPT Gas Solutions professionally meets the evolving gas solution needs of various industries, businesses and homes. As part of the IPT group IPT Gas Solutions is a subsidiary of IPT, and is hence supported by a firm renowned for quality, commitment and a long history in the petroleum industry.

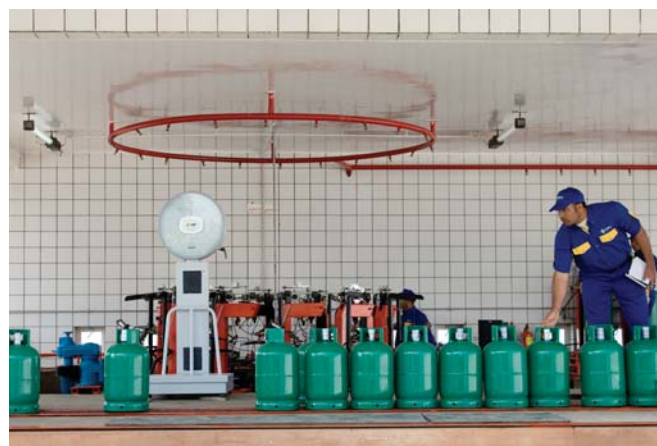

Offering door-to-door delivery (to stores, petrol stations, schools, companies, restaurants, hotels, factories and homes); cylinder and tank filling; bulk services; and even central gas system design and installation, IPT Gas Solutions stands for comprehensive services. With professional backing, quality facilities and resources, a solid approach, diverse services, prompt delivery, over 30 years of experience and more, IPT Gas Solutions is the source for all your gas solutions.

## The proper set up for bright prospects

## our facilities and capabilities

IPT Gas Solutions is fully equipped to fuel your needs thanks to our modern structure plant for the storage and LPG filling of all sizes of butane cylinders in the Hosrayel region of Jbeil which conforms to strict specifications and safety standards and utilizes the latest technology. With camping size, 10kg, 12kg, 35kg and additional cylinders of domestic butane for homes and small industries and business, liquid petroleum gas (LPG), propane and butane, and large trailers to service the demands of the largest business (with the capability to install 500, 1000 and 1500 liter gas aboveground and underground tanks), IPT Gas is at the forefront of gas solutions.

Our quality products, cylinders and transportation resources ensure client satisfaction while our premium gas solutions and extensive offerings delivered straight to your door fulfill your specific needs and keep your business moving forward.

Facilities that expand potential

## our team and values

IPT Gas Solutions' success is made possible because of our dedicated and informed team and long history of experience that stretches back over 30 years. Our expert team members are always ready to fulfill your needs while our safe, secure and environmentally friendly approach ensures we give more to the community. IPT Gas Solutions is dedicated to professionally serving our customers via the latest technology, premium quality products and prompt distribution services. To this end, we emphasize offering competitive prices and respecting our clients' real requirements.

## our services and added value

### Our services encompass:

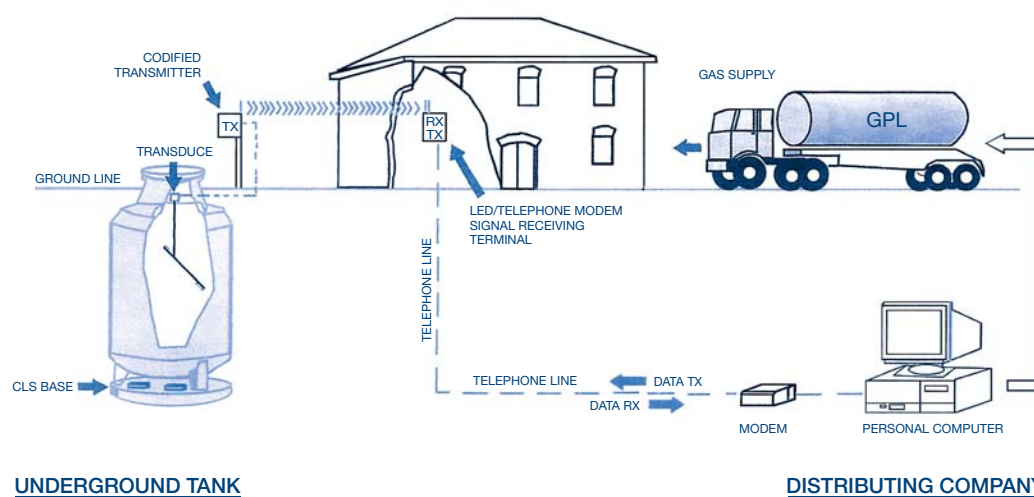

- Cylinder filling service at our factory for individuals and resellers
- Door to door distribution and delivery of LPG cylinders to stores, petrol stations, schools, companies, factories and more
- Bulk services, tank filling, and distribution of propane to industries, hotels, restaurants hospitals homes, buildings, and homes
- Designing and installing complete central gas systems based on thorough technical studies for kitchens, radiators, chimneys, hot water, and barbecues, hotels, factories...etc

### Our added value includes:

- Official distributor of the imported LPG tanks (Antonio

Merloni Trademark, made in Italy) in many sizes aboveground and underground (such as the "Marsupio" underground tank which eliminates the risk of incorrect epoxy paint coated tank installation)

- Securing a safe, efficient, clean and economical solution
- Competitive prices
- Client-focused, placing great emphasis on satisfaction and meeting real needs
- Fully equipped facilities, diverse services, efficient delivery network
- Backed by a well-established and renowned mother company
- Dedicated to innovation and the introduction of new products and solutions

## development and innovation

Ever focused on the future IPT Gas Solutions is committed to improving the gas solutions sector by researching and analyzing possibilities and market trends. Prompted by innovation, IPT has researched the best practices and discoveries from various European countries to be among the pioneers in introducing the most significant to Lebanon:

Home-use cylinders in plastic to enhance safety and "Auto Gas System" with all the equipment and technology to redefine the pleasure of driving on gas. The underlying drive is to meet the demands for an environment friendly fuel and to save money for our clients.

Offerings and extra features  
that surpass expectations
