IPTEC-USEK Biodiesel Production Project

On 16 July 2018, **IPT Energy Center (IPTEC)** and the Holy Spirit University of Kaslik (**USEK**) with the support of the UNDP in Lebanon signed an MOU to install a pilot plant for the production of biodiesel from Waste Cooking Oil (WCO), at USEK campus in Kaslik, in the presence of USEK President Father Professor Georges Hobeika, **IPTEC** President Dr. Toni Issa, and the Energy and Environment Programme Manager at UNDP Ms. Jihan Seoud.

In his speech, Dr. Issa stated that this project is aligned with the strategy of **IPT** and **IPTEC**, IPT's specialized research center in the field of energy, oil and gas. He shed light on the achievements realized by **IPTEC** under the "National Campaign for Air Pollution Reduction in Lebanon through Efficient Energy Use in Land Transportation" launched by the center in 2012 in collaboration with International organizations and several partners in the public and private sectors, which included a number of programs and activities to raise awareness on air pollution reduction and efficient energy use in land transportation. Dr. Issa wished for this project to become a role model in Lebanon, and to deliver tangible results through the effective use of biodiesel as a new source of energy... [Read more](#)

President of IPT Energy Center (IPTEC) Interviewed on Renewable Energy

In light with the pollution crisis that Lebanon is witnessing, Dr. Toni Issa, President of IPT Energy Center (IPTEC) was interviewed by the National News Agency on "The Benefits of Renewable Energy: The Solution To Reach a Pollution Free Environment". In his interview, Dr. Issa

Energy Sustainability

Jbeil Municipality Bans The Use of Plastic Bags

Starting in 2019, the Jbeil municipality will ban all use of plastic bags – a bold initiative to address the country's addiction to plastic that has garnered the praise of many environmental groups in Lebanon. "The Jbeil municipality got it right," Julien Jreissati, Arab world campaigner at Greenpeace Mediterranean, told *The Daily Star*. "Our path out of this garbage crisis starts by reducing the amount of waste we produce. Given the catastrophic waste management situation, most of the waste we throw comes right back at us, either on our shores, in our lungs or on our plates". * Source: [Daily Star](#)

highlighted IPT's commitment to energy sustainability mainly through its Energy Center IPTEC that successfully fulfills the company's Corporate Social Responsibility. He assured that IPTEC is actively striving to enhance knowledge on energy conservation and efficient energy use to reduce environmental pollution resulting from the use of energy sources, and promote the use of clean, alternative and renewable energy solutions. He confirmed IPT's green strategy that translates into various initiatives... [Read more](#)
