Our Service Has Become 100% Lebanese

LEBANESE WORKERS WITH IPT VICE CHAIRMAN

We proudly inform you that the service at [IPT Sustainable Station](#) in Amchit is now 100% Lebanese with the same quality of service you are used to.

In view of the difficult and exceptional circumstances in which the country is undergoing, IPT started in an unprecedented and responsible initiative to hire Lebanese workers at its service stations that are directly managed by the company. The jobs are the ones that were previously occupied by foreign workers namely gas filling, car washing, oil change, and other services.

The beginning is from **IPT Sustainable Station** in Amchit, where you can now experience a full Lebanese service; 15 Lebanese workers are ready to serve you. Worth noting that Lebanese workers will be gradually recruited on most IPT Stations in Lebanon, so the service becomes 100% Lebanese. By creating job opportunities for Lebanese and through this step, IPT seeks to challenge the serious repercussions of the current social and economic situations and the significant increase in unemployment rates. Corporate Social Responsibility

Positive Feedback on IPT's "Hiring Lebanese" Initiative

Today, we are very proud to receive positive feedback on our "Hiring Lebanese" initiative in general, and its real first manifestation at our "Sustainable Station" in Amchit as first step. The huge support, from our customers as well as the media that helped us spread the word, took our enthusiasm into the next level to expand our initiative gradually on most of our stations. Here

Nitrogen Tires Inflator at "IPT Sustainable Station"

For us, your Safety comes First! We advise you to check your tire pressure on weekly basis during winter season. For this, we recommend you to pass by ["IPT Sustainable Station"](#) to check up your tires and inflate your tires with Nitrogen.

The practice of inflating tires with nitrogen is considered to be eco-friendly! Nitrogen tire inflation increases fuel efficiency by maintaining proper tire pressure for a longer period of time. Consequently, the optimal fuel economy you get with nitrogen, will produce less air pollution and less greenhouse gas emissions. [Read more](#)

are some of the positive feedbacks:

- I am very delighted to see Lebanese faces serving me at a gas station
- I heard the good news! consider me as a loyal customer from now on
- Thank you IPT. I am proud of you and your initiative; you are a role model to other stations
- The success of this step can potentially turn unemployment figures across the country... Bravo! [Read more](#)
