Health and Safety Training at IPT

In order to reinforce its health and safety awareness, IPT organized on July 24, 2018 a training session on Firefighting & First-Aid at its LPG facilities in Hosrayel-Jbeil in collaboration with the Lebanese Civil Defense, and in the presence of members of IPT management.

This training comes in line with the continuous health & safety training program organized by IPT for its employees to be well instructed about the strict safety measures applied not only at IPT gas stations, but also at its headquarter, terminal, LPG facility and surroundings. [Read more](#)

Michel Issa Foundation (MIF)

Join Us to Inaugurate The Statue of Our Lady Of the Seas @ Amchit Seaport

The Statue of Our Lady Of the Seas has finally reached its final destination on the top of Amchit Seaport as a result of the collaboration between Michel Issa Foundation for Local Development (MIF) and the Fishermen Cooperation in Amchit. In this occasion, a mass is organized on August 17 at 7:00 pm in the presence of Maronite Patriarch Cardinal Mar Bechara Boutros Rahi and Maronite Bishop of Jbeil Michel Aoun to inaugurate the statue and celebrate Virgin Mary's Assumption. Join us with your families and friends, and be many! [Read more](#)

Our Promotion: Your Feedback!

Your opinion matters to us. Did you change your car's oil this summer? If yes, please feel free to complete [شو رأيك](#) form on IPT website for any feedback, comment, suggestion,

Energy Sustainability

Environmental Benefits of the Photovoltaic System at IPT Hq

Inline with IPT's strategy to reduce pollution and conserve energy, the company installed in 2016 a Photovoltaic System and solar water heaters on its roof in Amchit. The Solar power system uses 126 solar panels installed on the headquarter's canopy, producing 32 KWh peak of power transferred directly to the electrical grid through inverters. The system has an actual production of 50 MWh/year which will translate into annual savings of around \$6,000 and greenhouse gases saving of 32 Tons. [Read more](#)

Using this capacity of solar panels at IPT Hq is equivalent to:

- reducing the emissions of 8 cars over a year
- 3969 gallons of gasoline consumed
- operating a Tv for 188,914 hours
- powering 209 computers in 1 year
- 903 tree seedlings grown over 10 years
