

Glacelf: A Very "Long-Life" Antifreeze!

Glacelf is a very "long-life" antifreeze made of nonethylene glycol and organic corrosion inhibitors. It has fast, effective protective properties. It provides a high level of protection against damage caused by freezing, cavitation, corrosion and overheating; therefore it is ideal for summer and winter season.

Glacelf is a European product by Total, IPT's supplier of Elf lubricants. When mixed with the appropriate quantity of distilled water, between 50 & 60% of your radiator's capacity, it becomes a coolant fluid recommended by experts for all internal ignition engines in cars, vans, trucks, construction machinery and agricultural tractors. Corporate Social Responsibility

An Inspiring Initiative at IPT "Saba" Station in Anfeh

Because the youth is the most affected by the political and economic situation in the country, a group of young women and men founded a committee a year ago under the name "Anfeh is our family" to unite all youngsters in the country without parties or sectarianism. They started carrying out many social and environmental activities to help people in need. Among those initiatives, they gathered last Sunday at IPT "Saba" Station in Anfeh with the aim of helping needy families from Anfeh... [Read more](#)

Big Oil Loses Refining Crutch With Margins Crushed Last Quarter

Source: Bloomberg

Six months on from crude's era-defining price crash, Big Oil is suffering from whiplash. Prices may have stabilized around \$40 a barrel after OPEC+ curbed supply. But the coronavirus is surging through Europe once again and the twin safety nets for majors in previous downturns -- refining and trading -- have come under severe pressure as consumers stay home.

"Refining margins are absolutely terrible," Patrick Pouyanne, Total SE's Chief Executive Officer, said earlier this month. The French major, along with a raft of other oil companies and refiners, have warned investors that slumping margins will be a drag on profits. [Read more](#)
